

REMARKS

The needed drawing corrections are made herewith.

The claims previously in the case have been replaced by a new claim which is believed to be proper as to form and clearly patentable over the cited references.

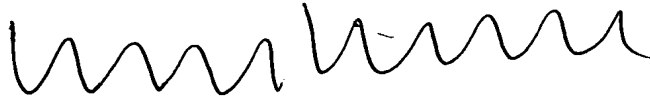

The new claim is directed to a versatile combination of a frame attachable to a conventional visor, the frame having a screen that can be moved to cover the central zone of the windscreen or the adjacent side window; or the frame can be dropped to increase the vertical area of the visor, and the screen in the same manner to the central zone or the side window. In this respect, it is different from KARFORD which does not have the same versatility, even when combined with FRANCIS, who does not cater for the central zone shading; or WESTERMAN, who does not provide shading for the side window. None of the prior art teaches the ability of the arrangement to operate in two planes - the first as shown in Figure 8 in which the screen 52 covers the top of the central zone and, although not illustrated, the top of the side window; and the second plane as shown in Figures 9 and 10 in which the screen covers a position below the top of the central zone or below the top of the side window.

As the new claim brings out these distinctions with ample particularity, it is believed to be patentable, and reconsideration and allowance are respectfully requested.

The Commissioner is hereby authorized in this, concurrent, and future replies, to charge payment or credit any overpayment to Deposit Account No. 25-0120 for any additional fees required under 37 C.F.R. § 1.16 or under 37 C.F.R. § 1.17.

Respectfully submitted,

YOUNG & THOMPSON

AMENDMENTS TO THE DRAWINGS:

Figure 8, 9 and 10 have been amended so as to delete reference 52 from Figures 8, 9 and 10 and add it to Figure 8 at a different place.

**APPENDIX:**

The Appendix includes the following items:

- replacement drawing sheets for Figures 8, 9 and 10
